

Appl. No. 10/708,196
Amdt. dated April 22, 2005
Reply to Office action of January 27, 2005

Amendments to the Claims:

This listing of claims will replace all prior versions and listings of claims in the application:

Listing of Claims:

- 5 1 (currently amended): A strengthened mirror structure, comprising:
 a planar [[A]] reflection mirror, having a reflection surface and a back surface; and
 at [[At]] least a strengthening element, stuck on said back surface of said planar
 reflection mirror through an adhesive.
- 10 2-3 (cancelled).
- 4 (original): The structure according to claim 1, wherein said adhesive is glue.
- 5 (original): The structure according to claim 1, wherein said adhesive is twin adhesive.
- 15 6 (original): The structure according to claim 1, wherein said strengthening element is a
 honeycomb plate.
- 7 (currently amended): The structure according to claim 6 wherein said honeycomb plate
20 is formed out of aluminum, ~~one of other metals~~ or paper.
- 8 (currently amended): The structure according to claim 1, wherein said strengthening
 element is smaller than said planar reflection mirror.
- 25 9 (currently amended): The structure according to claim 1, wherein said strengthening
 element is wider than said planar reflection mirror ~~so as to form fixing ends~~.
- 10 (new): The structure according to claim 9, wherein said strengthening element

Appl. No. 10/708,196

Reply to Office action of January 27, 2005

comprises a plurality of screw holes formed on opposite ends of said strengthening element and formed on portions of said strengthening element that do not cover said planar reflection mirror.

5 11 (new): The structure according to claim 10, further comprising a plurality of screws, each screw passing through one of said screw holes for securing said strengthening element to an object.

10 12 (new): The structure according to claim 1, wherein said strengthening element has a planar shape for uniformly strengthening said planar reflection mirror.

13 (new): A rear projection television, comprising:
a screen;
a planar reflection mirror for projecting images upon said screen, said planar
15 reflection mirror having a reflection surface and a back surface; and
at least a strengthening element, stuck on said back surface of said planar reflection mirror through an adhesive.

20 14 (new): The rear projection television according to claim 13, wherein said strengthening element is a honeycomb plate.

15 (new): The rear projection television according to claim 14, wherein said honeycomb plate is formed out of aluminum or paper.

25 16 (new): The rear projection television according to claim 13, wherein said strengthening element is smaller than said planar reflection mirror.

17 (new): The rear projection television according to claim 13, wherein said strengthening

element is wider than said planar reflection mirror.

18 (new): The rear projection television according to claim 17, wherein said strengthening
element comprises a plurality of screw holes formed on opposite ends of said
5 strengthening element and formed on portions of said strengthening element that do
not cover said planar reflection mirror.

19 (new): The rear projection television according to claim 18, further comprising a
plurality of screws, each screw passing through one of said screw holes for securing
10 said strengthening element to an object.

20 (new): The rear projection television according to claim 13, wherein said strengthening
element has a planar shape for uniformly strengthening said planar reflection mirror.
